

Requirement 1. VC/PAVN Logistic Requirements
(Reference: Section II.A. of Terms of Reference)

1. Provide the daily supply requirements for the VC/PAVN main force battalions in South Vietnam under the following conditions:

- a. The present level of forces and combat (probably about once in every 35 days for each battalion).
- b. The present level of forces and escalated combat (once in every 7 days for each battalion).
- c. The force increased to 155 battalions by the end of 1966 with each battalion engaging in combat once in every 3 days.

2. Break down the requirements by class of supply for VC main force units and PAVN forces separately, and compare total requirements with requirements from abroad. These questions can be answered by filling in the blank spaces in the attached tables. Indicate methodology by adding footnotes to the tables. We would also like to have a brief justification for any differences between requirements for VC and PAVN forces by class of supply.

DIA review(s) completed.

Deadline to CIA: 28 January 1966.
